Enjoy the ride

Get more out of your holiday 2011
Safely, easily and in style

Everybody
wants to
get away
sometimes

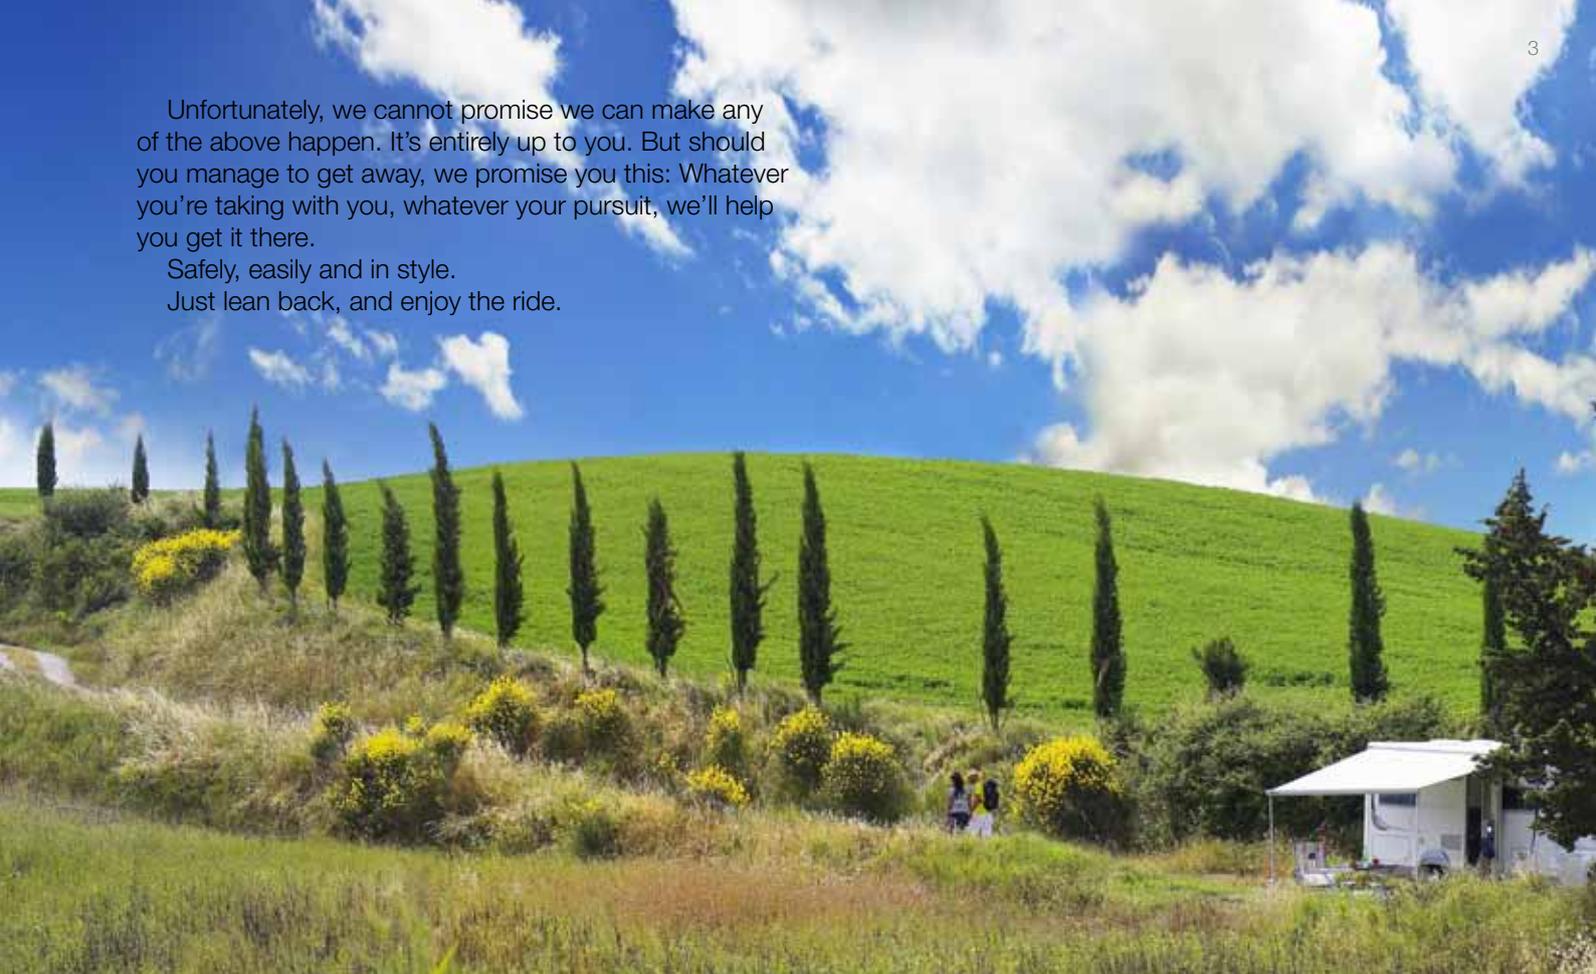

Wish you were somewhere else? You're not alone. Most of us try to get away from time to time. From appointments. Spreadsheets. Bad coffee. Parking tickets. You name it.

We all have places we'd rather be, people we'd rather see, friends we'd rather meet. We all have our own little adventures to explore – and passions to pursue.

Unfortunately, we cannot promise we can make any of the above happen. It's entirely up to you. But should you manage to get away, we promise you this: Whatever you're taking with you, whatever your pursuit, we'll help you get it there.

Safely, easily and in style.
Just lean back, and enjoy the ride.

Welcome to the world of Thule

You like holidays and adventure, your freedom is important, but you are also very demanding when it comes to quality, comfort and safety.

Our sophisticated range of accessories for your motorhome or caravan means we have made it easier for millions of campers to enjoy a carefree break. We are constantly developing even brighter, safer, and more elegant accessories.

Have a look at our extensive range, be amazed, and step into the world of Thule!

It is a way of life

OMNISTOR

Perfect design Perfect functions

Our R&D department is constantly on the hunt for new and innovative ways to help you enjoy the ride. As a result, we're continuously developing a wide number of features that are unique to the market.

Our products are distinguished by an accomplished design language, based around a range of different variables, where design is perfectly balanced against function and your needs as a user.

Patented locks

The double security lock ensures extra safety when the vehicle is moving. Once the awning is closed, the front frame is bolted by the patented locks at both ends of the awning. The locks are automatically unbolted when the awning is opened using the telescopic handle. The Thule|Omnistor 5003, 8000, 6002, and 6900 have this double security lock, whilst the Thule|Omnistor 2000 is fitted with manual locks.

Quick-Lock

The height of the support legs can easily be set or adjusted using the patented Quick Lock system. All Thule|Omnistor awnings have this innovative and extremely user-friendly system.

LED lighting strip

All wall mounted awnings can be equipped with a 12 V LED lighting strip which is simply attached using professional quality tape onto the bottom of the awning cassette. The strip will stick to just about every single surface thanks to the 3M sealant. 12V connection required.

Adapters

The awnings can be attached to the vehicle using one of the many adapters. The adapters are made of aluminium. They are anodised or powder coated, depending on the application, and are available per set or full length. Not standard for series 6 awnings. We have a team which is working constantly to follow up new developments to provide a solution as soon as possible. Page 72-75

Sturdy and stable profiles

All awning parts are made from extremely strong material. Each part which is assembled in the awning, as well as the casing, are subjected to strict requirements.

Telescopic handle

Absolutely simple! You open or close your awning in no time at all using the telescopic handle. The handle is standard for all awnings with spring arms and is available in two different lengths, 102 to 155cm or 130 to 190cm (depending on the type of awning).

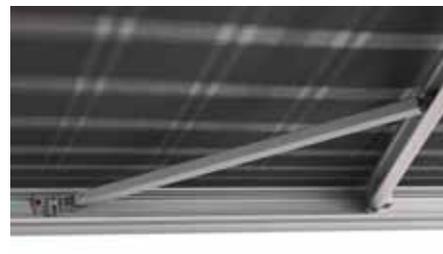

Awning fabric

The top quality PVC fabric used for Thule|Omnistor awnings is pressed down along both sides and has a coating. This coating keeps the fabric colour fast, watertight, washable, and durable. It not only ensures a high degree of scratch-resistance, but also increases the UV-resistance and heat-resistance properties. The fabric may be rolled up for a few days, even if it is wet.

Motorised awnings

Some awnings can be equipped with a motor. The 6002 and 6900 model can be supplied with or without a 12V motor, whereas the 8000 can be retrofitted with a remote-controlled 230V motor kit after your purchase.

Integrated tension rafters

In order to raise fabric tension, the Thule|Omnistor 8000 comes equipped with integrated tension rafters. Optional tension rafters are also available as accessories.

Monoblock & Spring arms

The combination of the utmost sturdy spring arms and the monoblock makes the Thule|Omnistor awnings extremely stable. Normal upward and downward movements are absorbed to protect the vehicle panel (no extra pressure). The double steel cables in the retractable arms ensure that the Thule|Omnistor awning is resistant to wind and also guarantee maximum fabric tension.

Quick release

The telescopic support legs are very easy to unfold. They are lowered vertically from the front frame and stand automatically in the correct position to be set at the right height using the Quick Lock system. This means that the support legs never come too close to the vehicle panel. The dual-purpose facility ensures that the awning can be set up on any base. This is done either by securing it with ground pegs in a natural base or using the special holders which can be assembled on the panel.

Accessories

Every awning can be fitted with a wide range of accessories. Starting from sun blockers to complete tents, from sealing profiles to extra tension rafters.

Thule Fabric Colours

– which colour do you prefer ?

PVC fabrics

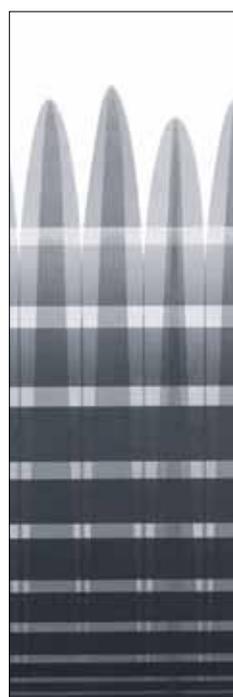

31 - Mystic Grey

32 - Sapphire Blue

03 - Blue Sky

04 - Alaska Grey

The Thule|Omnistor PVC fabric consists of several layers:

1. Top coat of the PVC protects against scratching and fading
2. Vinyl with painted pattern
3. High strength polyester scrim
4. Vinyl with painted pattern
5. Top coat of the PVC fabric protects against scratching and fading

Full length fabric

Our fabric pattern is printed along both sides and over the entire surface (31 & 32).

The fabric can be cleaned using the Omni-Cleaner.

13 - Screen

22 - Uni Grey - Ral 9002

The colours of fabrics and cassettes may show slight variations from standard colours due to the printing process. For more information please contact a dealer.

Thule Cassette Colours

– which colour suits your vehicle best?

Choose the cassette colour which suits your vehicle best. Thule|Omnistor strives to improve both quality and aesthetics. Cassettes are available in a multitude of colours so finding one that ties-in with your vehicles colour scheme should be easy. Depending on the type of awning, you have a choice of powder coated white, aluminium, or anthracite. To find out which cassette is available in which colours, please refer to the grid below, the price list or contact one of our dealers.

Thule Awning Accessories

– options for your awning

5m LED strip

Flexible LED strip, delivered with 3M tape on the back. Connection cable (1m) included. Working voltage 12V DC, power consumption 340-380mA per meter, 60 power LEDs per meter. White light, with light starkness up to 300 Lumen. Suitable for out door usage: waterproof IP66, Can be shortened each 5 cm. Can be stuck on most standard even materials and surfaces. Long lifetime #50 0000 83

Hold down side strap kit

Prevents the awning and front tent from damage due to high winds or storms. Attach to the support legs in order to prevent damage to the fabric. Can easily be used in combination with a Safari tent or Rain and Sun Blocker.

Consists of 2 black straps (both 3m), installation material, and supports. Storage bag supplied. (Not for Thule|Omnistor Caravan Style and Thule|Omnistor 2000).

#50 0000 52

Hold down kit

Prevents the awning and front tent from flying up. Installed over the entire length between the spring arms and the fabric. Consists of 1 black strap (11m), installation material, and supports. Storage bag supplied.

For any type of awning up to and including 6m. Can also be used with the Thule|Omnistor Caravan Style and Thule|Omnistor 2000.

50 0000 38

Motorkit

A retro fitted motor kit accessory has been developed exclusively for the Thule|Omnistor 8000. Includes remote control and relay. A safety device ensures that the awning cannot be opened whilst the vehicle is being driven.

Simple connection to a 230V supply (with a 12V connection you can use a 300 Watt inverter, which is available from a dealer). Settings are programmed digitally so that the frame always closes correctly. There is a hidden emergency key so that the awning can be operated at any time, even during a power failure. white #50 0000 80 - ano #50 0000 81

Sealing rubber

Ensures that the gap between the vehicle and awning is sealed when using a flat adapter (series 5 and 8). Fitted with integrated drainage system.

Small - 5 cm: Large - 8 cm:

ART. NR.	LENGTH	ART. NR.	LENGTH

50 0000 32	30 m	50 0000 35	30 m

Omni-Gutter

Multi-purpose, self-adhesive drainage system. Fits most caravans and motorhomes.

ART. NR.	LENGTH
50 0350 31	3,50 m
50 0450 31	4,50 m
50 0000 31	30 m

EPDM sealing

Seals the gap between the vehicle and awning (series 6). Made from black EPDM foam with closed cell structure. Available in 2 pieces (both 2m).

Thickness: 25mm
Width: 30mm
#50 6013 00

Universal tension arm

Straight aluminium tension arm with a telescopic operation. For awnings with a projection of 2.25 to 2.75m.

Includes installation pieces for series 5,6, and 8.

#51 4103 00

Omni-rafter

Curved aluminium tension arm with a telescopic operation. For awnings with a projection of 2.25 to 2.75m. For awnings 3.50m or more in length. Includes installation pieces for series 5, 6, and 8.

Ideal for improving rainwater drainage.

#51 4104 00

Adapters

Whichever vehicle you drive, you will always find an ideal adapter from Thule|Omnistor. The never-ending research and modernisation carried out by caravan and camper van constructors means we are constantly obliged to find the perfect solution quickly. Another area in which Thule|Omnistor is clearly ahead of the field.

We are pushing our efforts to the limit.

The following accessories are indispensable: Innovative solutions for simple and original connection to an Thule|Omnistor awning. Mounted in just seconds of time.

Sun-Blocker Front

This is a transparent screen fabric which lets the light in, but protects you from the heat. Height 1.40m. It slides into the front profile. It fits all our awnings.

ART. NR.	LENGTH	HEIGHT SUN BLOCKER
21 0240 13	2,40 m	1,40 m
21 0280 13	2,80 m	1,40 m

SAFARI

Thule Safari Residence G2

– no. 1 in awning tents

New

- Timeless and elegant design
- Extremely high stability.
- High quality fabric
- Solid weld connections of the fabric for optimum wind and water tightness.
- Large window surfaces for greater incidence of light and an open feeling of spaciousness.
- Side windows fully open, whilst remaining screened by a mosquito mesh.
- Mud flaps can be folded out inside and outside of the Safari Residence and can be tensioned.
- Side panels and front panels to be ordered separately.
- The colour of the awning fabric can be continued in the front panel of the awning tent, whereas the side panels come in standard grey.
- The front is available with doors on the left or right hand side.
- The front panel rolls up completely. The window at the front does not open separately.
- Luxury storage bags (#50 0000 20), wind slip and curtains available as options.
- Available for awnings from 3.00 m up to 6.00 m, with mounting height of 2.15m up to 3.10 m.
- Modular construction, the front panel is slid into the lead rail of the awning. Clamping profile ensures mounting and connection of the side panel to the awning fabric.
- Double profile ensures wind tight sealing between front and side panels.
- A double rubber flap ensures full sealing with the vehicle wall.
- Diagonal support between the mast and clamping profile.

Thule Safari Room

– room with a view

- Superlative fabric quality.
- Versatile, consists of two separate side panels and a front panel.
- Front panel is slid into the front profile of the awning using a rope, and can be rolled up in full.
- The side panels are suspended from a tensioning bar between the awning cassette and the front profile.
- The side panels are joined to the awning canvas using clips with anti-slip strips.
- A double profile ensures the windtight sealing between front and side panels.
- The side panel joins up to the vehicle by pressing the foam band.
- The wind slip comes standard.
- The side panels and the front panel are also available separately.
- The curtains are available as options in grey or blue.
- Available for wall awnings from 1.90 all the way up to 6.30 m, for roof awnings from 2.60 m to 5.50 m, with a mounting height ranging from 1.80 m up to 3.10 m.

Thule Safari Style

– specially designed for your Caravan Style

- Made from extremely light weight grey polyester. Mud flaps in PVC.
- Modern design.
- Large windows giving a panoramic view.
- Two broad doors front left and front right.
- Constant air circulation. Three sealable ventilation holes that come standard with mosquito mesh.
- Modular construction, the front panel is slid into the lead rail of the awning. PVC clamping profile ensures mounting and connection of the side panel to the awning canvas.
- The side panel joins up to the vehicle by pressing the foam band.
- A double profile ensures the windtight sealing between front and side panels.
- UV-resistant and fungus-resistant.
- The storage bags, wind slip and curtains all come standard.
- Available for the Thule Omnistor Caravan Style starting from a length of 3.00 m, for mounting heights between 2.20 and 2.60 m.
- Weight: minimum 15.5 kg – maximum 19 kg.

Thule Tent Accessories

Omni-Cleaner

Ideal for cleaning the PVC awning fabric. Supplied in a user-friendly spray bottle. Contains no abrasive or aggressive components.
#21 0007 00

Repair kit

It is not always necessary to replace the entire fabric at once in the event of damage. You can easily repair minor damage to the Thule|Omnistor fabric using the repair kit.

Discover the world on your bike.

BIKE

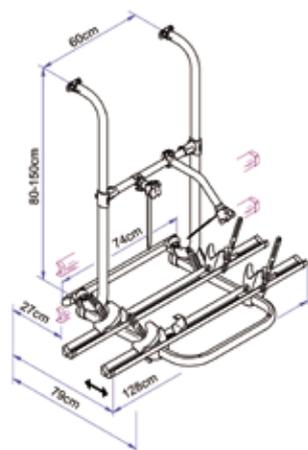

Thule Omni-Bike Elite

– the simplest and safest solution

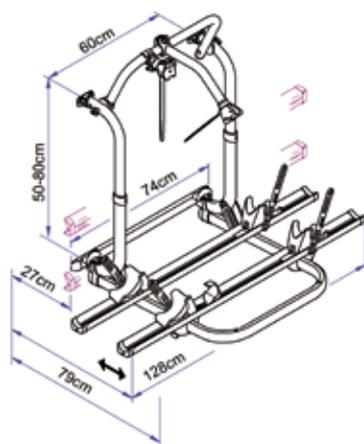

- Up to 4 bicycles max.
- Robust oval profiles give this bicycle carrier extreme stability and solidity.
- Increased safety thanks to new Rack-Locks that prevent the carrier from folding out whilst driving.
- The bottom and, optionally the top installation profiles evenly distribute the load across the wall.
- To even further facilitate fitting your bicycles, the Thule Omni-Bike elite has sliding rails that can be adapted in width and in depth (only the 2nd and 3rd rail). The sliding wheel holders will take just about every type of bicycle.
- Detachable and easy to move bicycle clamps are supplied standard.
- New or existing attachment holes can be reused or covered up with the mounting profiles.
- For vehicles that have a back wall that has already been equipped with mounting anchors, we have purpose-designed models in the Elite FH and HH. The Elite FH is suitable for standaard Fiamma fixation points and the Elite HH is suitable for standaard Hymer fixation points. Full details from your dealer.

Thule Bikecarrier Accessories

– elegant, smart and compact

Bicycle clips

All bike carriers in the Thule Omni-Bike range are fitted with the new bicycle clips. Earlier models, too, can be fitted with the new bicycle clips. A soft cushion fits all round and oval bike tubes and helps to prevent damage. Both ends of the bicycle clip can be rotated in all directions for simple fastening.

A cable lock can be attached through the eye of the bicycle clip to prevent theft.

#28 0002 00

Omnistor Apollo

– the roof box for every occasion

- Best price /quality ratio
- Light-weight
- Elegant design
- The Apollo 100 opens at the rear and the lock clicks shut automatically when you close the box.
- The Apollo 700 opens along the right side and has a central locking system.
- The key can only be removed if all locking points are securely bolted.
- The boxes are made of high impact-resistant material with special UV protection. The box lid is light grey, whilst the base is black.
- The mounting is done using the U-bolts, which are supplied as standard. You will have to drill some mounting holes when you use the box for the first time.
- Both boxes are fitted with a specially patented spring system. This provides you with a bigger opening angle and makes it easier to open and close the box.

TYPE	WEIGHT	CAPACITY	L x W x H	ART. NR.
Apollo 100	11 kg	350 l	139 x 90 x 42	27 0139 11
Apollo 700	16 kg	440 l	232 x 69 x 40	27 0323 11

Omnistor Carry All

– loading at an ideal height

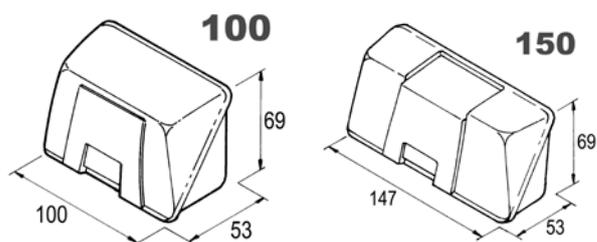

Omnistor Top Box

– ideal for roof installation

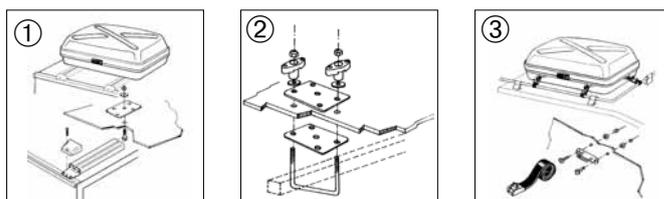

- Carry All
- Mounting with or without a bike rack
- Very solid ABS+
- Fitted with a protective net
- Spacious
- The Carry All Box is extremely user-friendly because of its mounting height. The box can either be mounted on a bike carrier with 3 rails or directly onto the special carrier frame on the rear panel. The luggage is protected by means of an elastic protective net.
- The Carry All Box exists in two different versions, both different in width and volume.
- Note: when mounting onto a bike rack, the maximum loading capacity is determined by the maximum loading capacity of the bike rack minus the weight of the box.

ART. NR.	TYPE	VOLUME	WEIGHT	COLOUR
25 0000 00	100	300 l	18 kg	white
25 0001 02	150	450 l	22 kg	white

- Three different mounting possibilities
- Very solid ABS+
- Inside frame in aluminium
- Cover with gas springs
- The white Top Box roof box is easy to open and close thanks to the integrated handle and comes complete with a watertight and rustproof lock.
- The box is shock-absorbent and weather-resistant.
- Reinforced with an aluminium frame on the inside and has a rubber seal to ensure there is no water ingress.
- Mounting by one of the three fixation sets

1. mounting rack (#50 0000 24)
2. mounting bridges (#50 0000 23)
3. mounting kit (#50 0000 22)

Thule Security Products

– security and comfort in 1

Thule Door Lock

- Deter burglars and improve the security of your motorhome or caravan with this quality frame-mounted Door lock.
- The Door lock is mounted through the wall with a mounting plate, a sealing cover and bolts.
- The Lock is fast and simple to install into your motorhome or caravan.
- Just slide left or right to lock and secure your motorhome and caravan doors, lockers or garage.
- The same Door lock can be used for left or right opening doors.
- Solid powder-coated aluminium
- Colour: white
- Weight: 0,83kg / Lock

Single pack: #29 0000 01

Triple pack: #29 0000 03

Thule Door Frame Lock

- This Door Frame Lock enables the installation of the Door lock when there is no space inside the vehicle to fit the mounting plate. This can happen due to wall furniture.
- The frame is screwed into the side of the wall.
- The same Door lock can be used for left or right opening doors.
- Requires a 5mm gap between door and frame.
- Solid powder-coated aluminium
- Colour: white
- Weight: 0,82kg / Lock

Single: #29 0000 02

Triple: #29 0000 04

Thule Security Hand Rail

- A sturdy and easy-to-fit Hand Rail ideal for your motorhome or caravan.
- Easy to install using bolts through the motorhome or caravan wall with 2 mounting plates, covers and bolts.
- The Thule Hand Rail has a unique double-locking design for ultimate security.
- The same Hand Rail can be used for left or right opening doors.
- In the open position, it offers a sturdy grab handle to help you get in and out of your vehicle and in its locked position it folds across the door giving added visible security.
- Solid powdercoated aluminium
- Colour: white
- Weight: 1,97kg

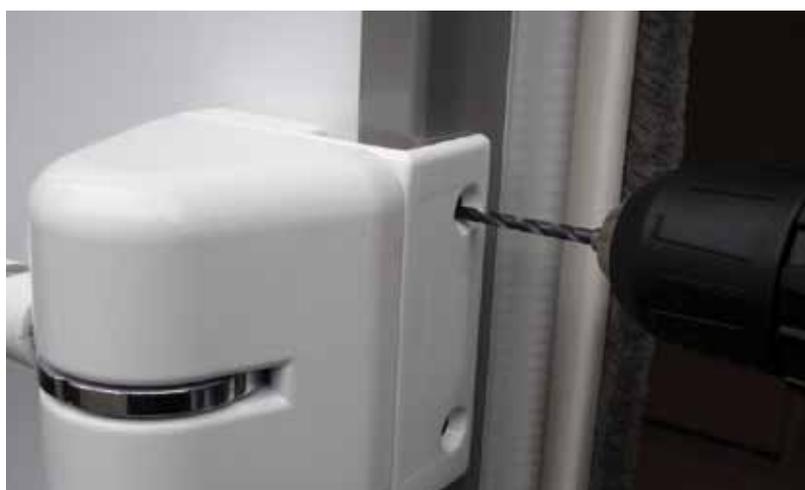

#29 0000 05

Thule Hand rail frame mounting kit

- This Kit enables the installation of the Hand Rail when there is no space inside the vehicle to fit the mounting plate. This can happen due to wall furniture.
- The frame is screwed into the side of the wall.
- Requires a 5mm gap between door and frame.
- Solid powder-coated aluminium
- Colour: white
- Weight: 0,35kg

#29 0000 06

Thule Van Program

– the complete kit for your van

Awning

The Thule|Omnistor 6002 awning in the special lengths of 3.25 or 3.75 meters matches your vehicle with either short or long wheel base (p22). This awning needs to be fitted with the special adapters, so that the awning has optimal operation (see page 83). For vehicles with short wheel base and vehicles till 6/2006, the Thule|Omnistor 6002 with a 3.25m length is suitable.

Fabric colours 03, 04. Ducato, Jumper, Boxer: Only high roof model H2. Mercedes Sprinter \geq 2007 and VW Crafter: Low and high roof model

Safari-Room

A set of special sides (#10 6050 22) is available for the Thule|Omnistor 6002 which can be combined with a standard front in order to obtain a complete Safari-Room. The awning must be installed with the special adapters.

Bike-carrier

The Thule Omni-Bike sport is mounted with installation profiles onto the right rear door of the vehicle. The door can be opened without removing the bikes. See page 50.

Ducato model < 2007 #18 8002 00

Ducato model \geq 2007 #18 8020 00

Extra: The Omni-Bike sport for Ducato (< 2007)

is also suitable for the Mercedes Sprinter < 2007 and VW LT

Ladder

The Omni-Ladder for Ducato, Jumper, Boxer is mounted with installation profiles onto the left door at the rear of the vehicle. See page 77

Model < 2007 #19 1004 10

Model \geq 2007 #19 1008 10

Roof rack

The roof rack has a measurement of 150 x 150cm and loading capacity of 100 kg. This package of roof rack + adapter gives you the opportunity to mount an Thule|Omnistor 6002 on top of your Fiat Ducato without the need for drilling!

Ducato model < 2007 #19 2200 00

Ducato model \geq 2007 #19 2300 00

Mercedes Sprinter \geq 2007 and VW Crafter #19 2301 00

Step

Installed together with the special mounting kit for Ducato, Jumper and Boxer, the Omni-Step slide out 12 Volt is the ideal step for your vehicle.

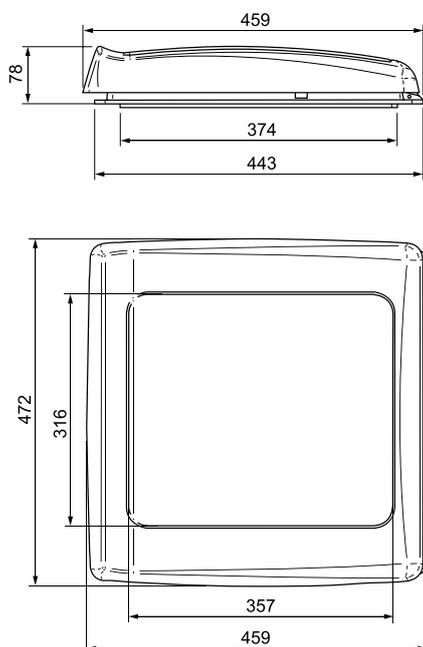

Omni-Vent

– from blackout to ventilation

Standard Omni-Vent: The watertight canopy of the standard Omni-Vent is available in three different designs (white, translucent, and transparent). The aerodynamic function ensures that you no longer need a spoiler. The roller blind has three positions and is standard with every Omni-Vent. The adjustable insect screen on the inside is only supplied with the manual roof light. All materials are made of impact-resistant and weather-resistant plastics.

The roof light is mounted with special clamps so that it is not necessary to drill through the roof, apart from the opening itself. The supplied interval tubes simplify mounting with roof thicknesses from 25mm to 50mm. For roof thicknesses from 40 to 60mm, there is an additional kit (# 63 0003 00).

Technical data

aperture size	400 x 400 mm
inner frame	458 x 462 mm
height (closed)	78 mm
roof thickness	25 - 60 mm
max. opening angle	40°
material dome white	polypropylene
material dome transparent	polycarbonat (Lexan)
material inner frame	polystyrene
material curtain frame	ABS
material outer frame	ASA

Ventilators

consumption Omni-Vent 12V	0.15 A - 2.50 A
max. air flow	20m³ / min.
diameter ventilator	300mm

- Simple operation
- Drill-free installation
- Various designs
- Retrofit

ART. NR.	TYPE	GEWICHT
23 7021 01	Omni-Vent roof light white	3.0 kg
23 7121 01	Omni-Vent roof light translucent	3.0 kg
23 7202 01	Omni-Vent roof light transparent	3.0 kg
23 8031 01	Omni-Vent 12Volt white	4.5 kg
23 8131 01	Omni-Vent 12Volt translucent	4.5 kg
23 8231 01	Omni-Vent 12Volt transparent	4.5 kg
63 0010 00	Ventilator 12V kit Omni-Vent 2009	1.6 kg

Omni-Vent with ventilator: The Omni-Vent with a newly developed 12V ventilator provides fresh air and ventilation inside your vehicle almost instantly. A simple press of a button on the control panel adjusts the speed and rotation direction. This new ventilator is not only silent, but also extremely low in energy consumption. The rotation sheet is made from translucent plastic to allow plenty of light in. A removable mosquito screen on the outside keeps dirt and vermin out and it is easy to clean.

The Omni-vent ventilator kit can easily be mounted in a previously installed Omni-Vent, from the outside in and without drilling. In addition to 12 ventilation speeds, this ventilator has an energy-saving function, a boost function, and a safety mechanism to guard against excess voltage and incorrect connection and blockage.

Omni-Ladder

– something for everyone

- Anodised or lacquered aluminium
- Stainless steel fastening components
- Extremely light
- For indoor or outdoor use

1 - #19 1011 00

2 - #19 1012 00

3 - #19 1000 00

4 - #19 1003 00

5 - #19 1005 00

6 - #19 1001 00

7 - Model < 2007 #19 1004 10
Model ≥ 2007 #19 1008 10

- Ladder with oval, white lacquered arms. 6 steps
- Foldable double ladder with oval, white lacquered arms. 11 steps
- Ladder with round aluminium arms. 6 steps
- Ladder with round aluminium arms (for Vans). 4 steps
- Ladder for indoor use
- Foldable double ladder with round tubes (10 steps)
- Foldable double ladder with round tubes for Ducato, Jumper, and Boxer. Includes mounting profiles.
- Roof rail with oval profiles. Standard length three metres, easy to adjust to the required length. Available in standard aluminium or white lacquered. Ends and arms finished in plastic. Option: set of 2 accompanying diagonal rails in aluminium with a standard length of 2.50m. Easy to adjust. Loading capacity: 70kg.

white: #19 5301 00
grey: #19 6301 00
cross rails: #19 1020 00

Omni-Step

– the ideal help

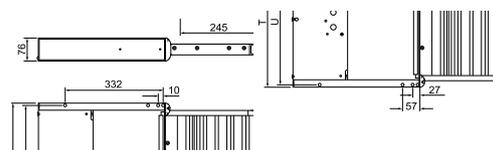

The Omni-Step is available in 3 manual and 3 motorised designs, all of which have different sizes. The manual step ladders have to be unfolded and folded by hand. The motorised versions are operated using a switch and conform to the EMV and CE standards. The formulated quality standards exceed European standard EN1646. A switch for the connection of a warning lamp in the vehicle is supplied as standard so that you would not be able to drive away with the step out. The corners of the step are rounded and give light in the darkness. Optional: For optimal visibility, your motorised Omni-Step (between 2003 / not for Slide out 700 and 12V double) can be fitted optionally with a set of LED lights (#62 0002 00 - 1 set per step). A relay (#62 0000 00) with motorised steps ensures that the steps are folded up when the motor starts. The Step control box (#62 0023 00) can be installed as an option. This ensures that the steps are automatically folded and unfolded when the door is opened and closed. The steps are made of corrugated anodised aluminium, the fastening frame from aluminium or warm zinc plated steel.
